Spring-return actuator, combined with thermoelectric tripping device BAT (72°C), for fire and smoke dampers 90° in ventilation and air-conditioning systems.

- Torque motor 9 Nm / 7 Nm
- Nominal voltage AC/DC 24 V
- Control Open/close
- Mechanical interface Form fit 12x12 mm, continuous hollow shaft

Operating mode	e The actuator moves the damper to the operating position at the same time as tensioning return spring. The damper is turned back to the safety position by spring energy when the supply voltage is interrupted.			
Safety Position Lock™	The Safety Position Lock <sup>™</sup> reliably holds the fire damper in the safety position in case of f therefore ensuring maximum safety. The technical solution for this function of the BFL ar BFN actuators has a patent pending.			
Thermoelectric tripping device	Complies with the specific requirements of	the standard ISO 10294-4.		
	BAT: If the ambient temperature of 72°C is exceeded, the duct outside temperature fuse will respond. If the duct inside temperature of 72°C is exceeded, then the duct inside temperature fuse will respond. When one of the thermal fuses responds, the supply voltage is interrupted permanently and irreversibly.
